

Secure Hosted Exchange

AppRiver's Secure Hosted Exchange, which utilizes its innovative Customer Portal, eliminates capital expenditures, management overhead and the complex processes businesses face as they manage their messaging environments.

Features & Benefits

- Easy, Web-based Access
- Unlimited Storage
- Embedded Spam and Virus Protection
- Optimized Performance. AppRiver utilizes Akamai IP Acceleration Technology, which dynamically plots the fastest path between user and e-mail, thereby assuring users will always have quick and reliable access to Outlook, Outlook Web and Mobile Device applications, regardless of location or what is happening on the Internet. The result? Faster Internet. Increased Mobility. High Availability
- Simple administration tools help manage e-mail routing, aliases, groups, users, mailbox storage, forwarding, passwords and client configuration in real time
- Windows Server Configuration and Active Directory are not required
- Migrate users at their own pace with "Domain Routing" and "Outlook Configuration" features
- Experience all the features of OWA, including mail notifications, calendar reminders, public folders, contacts, tasks, SharePoint documents, and global address list access
- Empower end users (and save administrative time) by allowing them to set up accounts, access email settings for mobile devices, view mailbox usage and reset their own passwords
- View live spam statistics and zero-hour virus alerts

Spam & Virus Protection

SecureTide™ is AppRiver's fully managed email protection service, eliminating up to 99% of unwanted email before it reaches a user's network. It is a powerful and flexible service that enables organizations of any size to manage email communications with the same level of control and protection as the Fortune 500. No hardware or software is required and a free 30-day trial is available to evaluate our service risk-free.

Email Encryption

AppRiver's CipherPost™ turns email into a trusted communications tool. CipherPost™ enables organizations to comply with regulations and enforce best-practice protection of message confidentiality. With CipherPost™, business communication via email is secured end-to-end, with content-level encryption through the most comprehensive, yet easiest to manage and use email encryption solution available. CipherPost™ integrates with existing infrastructure, and can be rapidly deployed internally and externally, even in the largest of organizations.

Spam Detection Engine

Message Sniffer™ is a powerful email scanning engine that uses advanced pattern recognition technology and a regularly updated "rules" database to accurately identify spam. The software is designed for easy integration into a broad range of existing email platforms and spam elimination products and is available as a SDK to OEMs and ISPs. Deployed since 2002 in AppRiver's complete outsourced email protection service, the technology currently is used in email security systems protecting more than 40,000 businesses and institutions worldwide. Our free 30-day trial allows organizations to try Message Sniffer™ risk-free.
